SUMMARY

MIS Reporting and Data Operations Professional with 10+ years of experience in operational reporting, data management, quality control, process coordination and reporting automation within the capital market domain. Skilled in Advanced Excel, SQL, Python, Pandas, Data Validation, MIS Reporting and Workflow Automation. Experienced in handling corporate disclosures, AGM/EGM records, board meeting data and business reporting systems. Currently enhancing expertise in Power BI, Dashboard Development and Data Analytics to support data-driven decision making and operational excellence.

EXPERIENCE

Data Associate

Praxis Consulting & Information Services Pvt. Ltd

📅 06/2015 - Present

- Managed operational reporting and data processing for capital market datasets covering corporate disclosures, AGM/EGM records, and board meeting information.
- Developed Python automation solutions using Selenium and Pandas that reduced manual processing effort by approximately 60% and significantly improved report turnaround time.
- Designed SQL queries to extract, validate, and transform business data for operational reporting and management analysis.
- Automated file processing, data validation, and reconciliation workflows, improving reporting accuracy while reducing repetitive manual tasks.
- Generated Excel- and Power BI-based MIS dashboards for tracking KPIs, operational performance, and business metrics.
- Performed quality assurance checks on large datasets to maintain 99%+ data accuracy and compliance with reporting standards.
- Collaborated with cross-functional teams to streamline reporting workflows, improving operational efficiency and reducing processing delays.
- Supported automation initiatives that increased productivity, standardized reporting processes, and minimized human error.

System Executive-Human Resource Department

Ideal Institute of Technology

📅 06/2014 - 06/2015

- Managed HR database containing employee records while maintaining data accuracy and confidentiality.
- Generated weekly and monthly HR MIS reports for management, improving visibility into workforce metrics and reporting efficiency.
- Supported employee record management and reporting processes through effective data handling and documentation
- Assisted in streamlining administrative workflows, improving reporting efficiency and data accessibility
